

Fall in Line

Ten Foot Pole

shine your boots
so you can march across the desert lift your knees look sharp as a knife you'll learn to like it you'll be all that you
can be
no one can stop our way of life [Chorus]
fall in line no back talk do what we told you step in time learn to show your pride turn the wrench build more
trucks than your neighbor
only work gives the
right to live feeling righteous
defending God's own country and wish you had more lives to give [Chorus] the empire calls for you to make a
sacrifice and fall in line rows and rows of credit card loans
rows and rows of cars rows and rows of bars rows and rows of bones
