Stay With Me

Ryan Peters

A walking disaster scene, these city streets are calling me
When troubles find the truth, you provide the avenue
And even when I say you're not enoughStay with me, I need you now 'cause you show me
The way this could be, if I chose you like you chose me
And all we need is a few great moments to believe in
All we need I stay with you, you stay with me nowLove has a stormy side, I spread my sails you let me glide
The waters rage, the wind, the rain
You're the lighthouse leading me in
And even when my love is insecureStay with me, I need you now 'cause you show me
The way this could be, if I chose you like you chose me
And all we need is a few great moments to believe in
All we need I stay with you, you stay with me nowAnd even when our love is hanging onStay with me, I need you now 'cause you show me
The way this could be, if I chose you like you chose me
And all we need is a few great moments to believe in
All we need I stay with you, you stay with me now
