

Tornado

Little Big Town

Thought you'll change the weather
Start a little storm, make a little rain
But I'm gonna do one better
Have the sun until you pray
I'm a tornado
Looking for a soul to take You're gonna see me coming by the selfish things that you did
I'm gonna leave you guessing how this funnel is gonna hit
I'm a tornado, looking for a man to break Yea I'm gonna lift this house, spin it all around
Toss it in the air and put in the ground
Make sure you're never found, mm Thought you'd take a swing try another girl, try another night
But it's the pain that brings my force of nature back to life
I'm a tornado, more disturbed than an F5 Hey I'm gonna lift this house, spin it all around
Toss it in the air and put it in the ground
I'm gonna lift this house, spin it all around
Toss it in the air and put it in the ground
Make sure you're never found, oh yeah, mm I'm gonna lift this house, spin it all around
Toss it in the air and put it in the ground
Yeah I'm gonna lift this house, spin it all around
Toss it in the air and put it in the ground
Make sure you're never found The winds are getting stronger and the sky is falling through
You ain't got much longer, 'til the rage rips off the roof
I'm a tornado and I'm coming after you
