

Ain't That a Bitch (Instrumental)

Johnny "Guitar" Watson

I'm working forty hours
Six long days
And I'm highly embarrassed
Every time I get my pay And they working everybody
Lord, they working poor folks to death
And when you pay your rent and your car note
You ain't got a damn thing left Ain't that a bitch, yes it is
Somebody doing something slick, yeah they are
It's got me wondering which is which
Might as well go out yonder and dig a ditch Ain't that a bitch, yes it is
Now ain't that a bitch Lemme tell you about my qualifications I program computers
I know accounting and psychology
I took a course in business
And I can speak a little Japanese, fox on Gotta work two years
To get one week off with pay
And when I'm on my job
I better watch every word I say Ain't that a bitch, oh boy
Somebody doing something slick, downtown
It's got me wondering which is which
Mighty well, go out yonder and dig a ditch Ain't that a bitch, it's way, way to cold
Ain't that a bitch Make me wanna holler, Lord, Lord
Lord, have mercy to see
Won't somebody please help me to see landlord
I want to play the guitar, come here guitar Somebody doing something slick Now listen to this Stop at the
supermarket
To get myself something to eat
And when I look at the prices
They knock me off of my feet I was in the baloney section
And I had to take myself a close look
Now Abdul-Jabbar couldn't have made these prices
With a sky hook Ain't that a bitch, yes, it is
Somebody doing something slick, yeah they are
It's got me wondering which is which
Mighty well go out yonder and dig a ditch Ain't that a bitch, ain't that a bitch Surely there's something slick
going on
Surely there's something slick
Surely there's something slick going on
Surely there's something slick, ain't that a Surely there's something slick going on
Surely there's something slick

Surely there's something slick going on
Somebody's show slick, ain't that aSurely there's something slick going on
Surely there's something slick
Surely there's something slick going on
Somebody's showing slickSurely there's something slick going on
Surely there's something slick
Surely there's something slick going on
Surely there's something slick
