

# Gin & Milk

## Dirty Pretty Things

I'm in to myself on uncertain terms  
I put gin in my milk to kill all the germs  
As I pray for the day that life will return  
And I pray for myself but I never learn  
No, I never learn See, I really like you but I'm nothing like you  
I try oh so hard but don't get so far  
You get my respect but we don't connect  
We're in it together so I'll love you forever  
I love you forever And so it rains on No one gives a fuck about the values I would die for  
Not the faceless civil servants, the rudimentary crack whore  
No one gives two fucks about the values I would kill for  
Give them something to die for, give me something to die for You won't really see me, I live in old movies  
Cloaked tightly in sin so they won't come in  
It's like spying on cities through cracks in the floor  
Thought I knew what the blag was but now I'm not sure  
What do I know anymore? And no one gives a fuck about the values I would die for  
Not the basest civil servant, the rudimentary crack whore  
And no one gives two fucks about the values I could kill for  
Give them something to die for, give me something to die for Still I'm into myself on uncertain terms  
I put gin in my milk, it kills all the germs  
As I pray for the day that life will return  
And I pray for myself but I never learn  
No, I'll never learn No one gives a fuck about the values I would die for  
Not the faceless civil servant, a rudimentary crack whore  
No one gives two fucks about the values I would kill for  
Give me something to die for, give me something to die for No one's too perturbed about the things that I would  
cry for  
I've been trying all my life until there's nothing left to try for  
No one's too perturbed about the things that I would live for  
Give me something to try for, give me something to try for
