

# Fragile

Kerli

You think you know me  
And everything that you consider me  
You think you know my name  
You think you know me  
And everything you get a chance to see  
You think you know my face  
You think you know my face  
You think you see me  
And everything that you consider me  
You think I'm more than you  
You think you see me  
Like the way I'm strong and stand by you  
I am fragile too, I am fragile too  
Yeah, I will be fine  
As the time goes by  
It may hurt at nights  
But I will be fine  
I will be just fine  
They think they know me  
And everything that they consider me  
They think I never cry  
They are thinking  
While they're making up their twisted lies  
She won't mind, she is nice  
She's as cold as ice  
You think you see me  
And everything that you consider me  
You think I'm more than you  
You think you see me  
Like the way I'm strong and stand by you  
But I am fragile too, I am fragile too  
I am fragile too, I am fragile too  
Just like you
