

Swords and Tequila

Riot

Dirty city, dirty games
Dirty women, dirty shames
The life that you lead
The chance that you took A shadow in the night
On the line, you're hooked
If you see us comin'
Don't you run the other way? Swords and tequila
Carry me through the night
Swords and tequila
Carry me through the fight Swords and tequila
Carry me through the night
Swords and tequila
Carry me through the fight Wait for the night to fall
To plan their attack
Fightin' songs on parade, they march
An army in black Killers without a cause
Rebels with no name
City's gone to the underground
Caught in a deadly game If you see us comin'
Don't you run the other way? Swords and tequila
Carry me through the night
Swords and tequila
Carry me through the fight Swords and tequila
Carry me through the night
Swords and tequila
Carry me through the fight And I just don't mean kickin' ass
If you see us comin'
Don't you, run the other way Swords and tequila
Carry me through the night
Swords and tequila
Carry me through the fight Swords and tequila
Carry me through the night
Swords and tequila
Carry me through, carry me through the fight
