

Dr Mario

Best Friends

They got you screaming
Just like a child
Cos you're so bitter and you're so wild
I've seen it before
But I'm not scared
Cos I'll be around
But I won't be there
You know that I'm jealous
You know I despair
You find so much passion in something so bare
So I'll keep my distance
And I'll bide my time
Cos I don't need pushing to sever my ties And the chemicals in my blood
Are all that's keeping me up
And I'm lying with my mouth open wide
I will fade into the night
And the chemicals in my blood
Are all that's keeping me up
And I'm lying with my mouth open wide
I look crazy but I'm having the time of my life You wasted your time
You wished it away
Concerned with the future,
Neglected today
And nothing you do
And nothing you try
Can make you wake up
In dreams it's all fine
Cos you had it easy
It sets you apart
From those who had nothing
And had it so hard
It's never enough
It's breaking your heart
But something for nothing would be a good start
