Right About Now

Paul Young

I see the city thru my window tonight
She smiles and throws her light on me
But this is no heaven, cos I'm without you
A summer breeze can't cool me down, oh no
I need to dance and I want you
Where are you baby, now that I need you
Right about now, I feel you there besides me
Right about now, I shiver when we touch
Right about now, I wish the stars would guide me
But night after night, day after day, I get this feeling
Right about now
As I watch the moon I'm thinking of you
Sleep won't give herself to me
Where are you baby, now that I need you
Right about now, I feel you there besides me
Right about now, I shiver when we touch
Right about now, I wish the stars would guide me
But night after night, day after day, I get this feeling
Right about now
The touch of my hand is all I can stand, as I'm laying here alone
You satisfy, you get me high, I can't do it on my own
Where are you baby, now that I need you
Right about now, I feel you there besides me
Right about now, I shiver when we touch
Right about now, I wish the stars would guide me
But night after night, day after day, I get this feeling
Right about now
