

# Killing Fields (Guitar Fixer Mix)

**Funker Vogt**

every little step you take  
every little move you make  
they're watching you they're watching you  
without respect for your life Everywhere are microphones  
they listen all day and night  
to every tiny word you speak  
in your very little world so you better speak a word  
keep the silence in your heart  
no more shoutings anywere  
until they leave you every little step you take  
every little move you make  
they're watching you they're watching you  
without respect for your life
