Wait It Out

Dog Day

Where do we go from here? How do we carry on?
I can't get beyond the questions
Clambering for the scraps in the shatter of us collapsed
It cuts me with every could have been
Pain on pain on play, repeating
With the backup makeshift life in waiting
Everybody says time heals everything
But what of the wretched hollow, the endless in between?
Are we just going to wait it out?
There's nothing to see here now, turning the sign around
We're closed to the earth till further notice
Stumbling clich
