

333

Against Me!

Feeling like I need to fall down some stairs
Maybe lay face down in the river and float
Perfect weather for a head wound
Or studying sophisticated nuances of putting holes in your lungs
150 million [?] war and the bomb
All reasons to be fearful but every noon, wake up
333, say that they knew me
333, bring it all back to me All the devils that you don't know
Can all come along for the ride
I wanna be as close as I can get to you
All the devils that you don't know
Can all come along for the ride
I wanna be as close as I can get to you
[Verse 2]
I saw the [?] and not in person
Blood [?] cynicism
Planned views and elevations walking through your terror garden
Visible mutations fading right before your fucking eyes
Cycles of death and regeneration, sensations of absence and loss
You should've been there by my side to see it all
333, say that they knew me
333, bring your love back to me All the devils that you don't know
Can all come along for the ride
I wanna be as close as I can get to you
All the devils that you don't know
Can all come along for the ride
I wanna be as close as I can get to you All the devils that you don't know
Can all come along for the ride
All the devils that you don't know
Can all come along for the ride
All the devils that you don't know
Can all come along for the ride
I wanna be as close as I can get to you
