

Make A Move

Royal Tailor

Mr. Good Intentions, so much I wanna do
My mouth just keeps on running
But I never follow through
I heard that true religion is love with hands and feet
I wanna find my own way
To reach a world in need
I've been captured by the unimportant
Locked in and now it's time to break free There's more to life
Open my eyes
Someone is needing you
So I gotta make a move
What good are words
When this world hurts
Real faith will come through
When I make a move We don't need permission to go outside of these doors
And dream some crazy dream
No one else has dreamed before
To show love and compassion
Whatever way it may be
To put faith into action
Do more than just believe
We are hope to those who have been broken
We were made to make a difference
Made to make a difference There's more to life
Open my eyes
Someone is needing you
So I gotta make a move
What good are words
When this world hurts
Real faith will come through
When I make a move I've been captured by the unimportant
Locked in and now it's time to break free
Now it's time to break free There's more to life
Open my eyes
Someone is needing you
So I gotta make a move
What good are words
When this world hurts
Real faith will come through

When I make a move
When I make a move
When I make a move
