

Lost Control

Grinspoon

Times up, yeah you should've known
Pretty little princess put it in a hole
Cold expect its not a disease
Can you take a photograph of us for them to see Bam, bam, bam trick or treat want to stay
You can do it ours and we will do it your way
Not so bad if you follow the plan
That's how it goes with your head in the sand We've already lost control
Already lost control
We've already lost control
Already lost control Can't we join an army of you
And help you out in battle defend your point of view
Turn tables it's just like you said
Now I'm in the army probably better off dead Jam slam wham I forgot what to say
You can take the bows and ride along the highway
Just thought you maybe would understand
What goes down in a rock and roll band We've already lost control
Already lost control
We've already lost control
Already lost control No fun cause its all been done
Picture perfect prefect thinks he's fucking won
Read out the list and see if it's free
Now I'm in your photographs as pretty as can be Whinge, winge, winge, was it something I said
Wait another moment, I talk about my head
I love shit when it gets outta hand
Smoke the grass quicker and then go rock the band We've already lost control
Already lost control
We've already lost control
Already lost control
