Waited Up

The Samples

We tried to get along
We tried to just get through
But something here is wrong
Don't tell me this is trueThere's no reason
Why I never saw the sign
You didn't say good-bye
I hoped that you were mineI waited up all night longThe night went on and on
The moon was rising slow
Somewhere in the dawn
The hardest feelings growThe power of that pretty face
My heart could end for you
Leaving such an empty space
Don't tell me this is trueI waited up all night long
