

Feel the Void

[Jerry Cantrell](#)

I can't feel my life
Makes me wanna cry
How bad I feel inside
Like I wanna die Can't explain, won't apologize
Re-entry blown while I was gone
Tilt of axis changed Destination unknown
Wreckage in tow
Depression grows
I have no home Consequences of accepted role
Discontented seeds, loveless garden thrown
Bitter crop to reap Understanding hard-pressed won
Through me you feel the void
From where the sad sounds come Free return alone
In time to see the sun go black
