Universal Love

2 Fabiola

So look at the world,
tell me what you see
There must be a better place
for you and me
We're waiting for so long,... ????
Turn these pages, it's history
Hope, hope, let's pray for peace
Everybody knows that why is a disease
So let's all change our ways together
We dream of the world
let's keep up the faith
There's a better place for you and me
Universal love
We dream of the world
let's keep up the faith
There's a better place for you and me
Universal love
So look at the sea,
it's dark and blue
The sun is always shining
for me and you
Never asking ??? together we will fly
It's time to solve this mystery
Pain, pain, crying in the rain
Everybody knows that why is not a game
So let's all change our ways together
We dream of the world
let's keep up the faith
There's a better place for you and me
Universal love
We dream of the world
We dream of the world
let's keep up the faith
let's keep up the faith
There's a better place for you and me
A place for you and me
Universal love
Universal love
We dream of the world

We dream of the world
let's keep up the faith
let's keep up the faith
There's a better place for you and me
A place for you and me
Universal love
Universal love
