

# It's What You Do With It

## Pennywise

Too much time in this same place got to get out  
An undenying feeling I gotta get away  
Too many thoughts in one space I've finally had it  
A dream will now take you to a secret place that's far away  
It's what you do with it  
It's what you've waited for  
And when you find it  
A place where no one has been before  
I know I gotta listen to my mind  
Because it happens to me until it happens to you sometimes  
Find a place where you can go where nobody knows  
You should listen to yourself sometimes  
Until it happens to you I know it happens to me sometimes  
Find a place where you can go where nobody knows  
Nobody knows  
Gone and without a trace I'd like to have it  
Taking only with me good dreams of yesterday  
And my best friend with whom I'll share this journey  
Our mental bags are packed 'cause we're leaving here today  
It's what you do with it  
It's what you've waited for  
And when you find it  
A place where no one has been before  
Like a wise I gotta listen to my mind  
Because it happens to me until it happens to you sometimes  
Find a place where you can go where nobody knows  
You should listen to your self sometimes  
Until it happens to you I know it happens to me sometimes  
Find a place where you can go where nobody knows  
Nobody knows  
It's what you do with it  
It's what you've waited for  
And when you find it  
A place where no one has been before  
It's what you do with it  
It's what you've waited for  
It's what you do with it  
It's what you do with it  
It's what you've waited for  
It's what you do with it  
It's what you do with it
