Electric Grave

Cathedral

Myriad atomic specters transcend
From the goodness of earth and amen
Electric legion on a voyage way beyond the end, yes, the end
Invocation through a crystal coffin pipeline, yeahOne second in eternity
A lifetime in this graveElectric grave
Soul and mind are saved
Colossal incantation
Human mushroom cloudAmbassador of this mortuary condemned
Under a scythe, the silence of a din
Howling vortex begging repent for their sins, yes, their sins
Celebration of life we have found without themEmpires falling down
Our beauty shall reignElectric grave
Soul and mind are saved
Colossal incantation
Human mushroom cloudPress the final button now
See the melting man
Radiation madness
Earth snorted by Satan, yeahFrom the electric grave
True believers saved
From the electric grave, yeahFrom the electric grave
Astral stairs are paved
True believers savedSnow blind, we burn, we meditate
Final vision of people fading away
Together our souls will join minus hands
No promise but we shall find our land, oh yeah
From the last nightmare
