

# Not That Far Away

Jennette McCurdy

They're playin' guitars with stars in their eyes on Broadway  
They're just paying their dues and waitin' for news on a big break  
I wish you were here 'cause sometimes I get lonely  
Guess I'm not the only new girl in town Momma, I promise I'll be alright  
I'll call to say I love you every night  
I'm just tryin' to write the story of my life You know all about this dream I've gotta chase  
I get a little closer everyday  
California is not that far away, I'm not that far away So many new faces and beautiful places in this town  
I'm learnin' the ropes on this crazy road, I'm goin' down  
I'm makin' my way, no one said that it'd be easy  
Trust me, believe me, I'm where I belong Momma, I promise I'll be alright  
I'll call to say I love you every night  
I'm just tryin' to write the story my life You know all about this dream I've gotta chase  
I get a little closer everyday  
California is not that far away, I'm not that far away We're miles apart, but you're in my heart  
I keep you with me everywhere I go Momma, I promise I'll be alright  
I'll call to say I love you every night  
I'm just tryin' to write the story my life You know all about this dream I've gotta chase  
I get a little closer everyday  
California is not that far away, I'm not that far away  
I'm not that far away, I'm not that far away
