I Want Candy

The Honor System

Why the sour face?
Has the pace of the American life hit you right on the chin?
Well we've got sunshine trapped in bottles,
Now look at our Cheshire grins
We've got pills
Recently approved
The little friends to see you through
Diagnosis, all symptoms pointed to
A new disorder made just for you
The kids got you down?
They're always screaming and crying and making a mess
There's crazy thoughts in those little heads that we can chemically address
We've go pills
FDA approved
The little friends to see you through
Diagnosis, all symptoms pointed to
A new disorder made just for you
Come play outside with the limiters, they cut the lows and highs
It's a life that will bleed you dry
