

# Fallen Star

## Dreamtale

Gazing the sky on a clear winter's night  
Moonlight lighting the path for me  
High in the sky a star seems to fly  
A falling star, it will be my guide Maiden is dancing, enchanting the man  
But in the end, who's in command?  
With his sword of might and his love by his side  
He's ready to face the world Follow the star  
It will lead you so far  
Follow the light  
Lighting the night Star is falling down when it reaches the ground  
I'll be there to take my toll  
With my star-wrought sword, I shall honor my Lord  
But remember where it came from But there, where the star fell  
A beautiful maiden was dancing and singing  
Stories tell that she descended from the Heavens  
With the star But then came that time, the time of great fight  
Cries of war rang through the whole land  
War tears apart, it will sunder the heart  
But in the end, love will prevail Answer the call  
But it will take its toll  
Follow the light  
Shining so bright Star is falling down when it reaches the ground  
I'll be there to take my toll  
With my star-wrought sword, I shall honor my Lord  
But remember where it came from Star is falling down when it reaches the ground  
I'll be there to take my toll  
With my star-wrought sword, I shall honor my Lord  
But remember where it came from Star is falling down when it reaches the ground  
I'll be there to take my toll  
With my star-wrought sword, I shall honor my Lord  
But remember where it came from
