Far And Gone

Day Of Fire

Twenty minutes till two, streetlights in view
Upon this avenue, my heart's bleeding for you
So gone, I'm on the move from room to room
It's every thought of you that keeps me pushing through
And I know you're waiting home each day, yeah
When I'm far and gone, walking on a city street to somewhere
I'll be holding on to your song till I find my way back
When I'm far and gone walking on a city street to somewhere
I'll be holding on to your song till I find my way back home
Over the phone I wait to hear you say
The words communicate, a loneliness today
So gone, I'm far away from day to day
The picture of your face upon my heart always
And I know you're waiting home each day, yeah
When I'm far and gone walking on a city street to somewhere
I'll be holding on to your song till I find my way back
When I'm far and gone walking on a city street to somewhere
I'll be holding on to your song till I find my way back
Find my way back home
Tonight streetlights and cars
Remind me I'm so far, so far, so far and gone
When I'm far and gone walking on a city street to somewhere
I'll be holding on to your song till I find my way back
When I'm far and gone walking on a city street to somewhere
I'll be holding on to your song till I find my way back
Find my way back, find my way back home
