

Will Do

TV on the Radio

It might be impractical
To seek out a new romance
We won't know the actual
If we never take the chance I'd like to collapse with you
And ease you against this song
I think we're compatible
I see that you think I'm wrong But anytime will do, my love, anytime will do
No choice of words will break me from this groove
Anytime will do, my love, anytime will do
What choice of words will take me back to you? Your love makes a fool of you
You can't seem to understand
A heart doesn't play by rules
And love has its own demands But I'll be there to take care of you
If ever you should decide
That you don't want to waste your life
In the middle of a lovesick lullaby But anytime will do, my love, anytime will do
No choice of words will break me from this groove
Anytime will do, my love, anytime will do
The choicest words will take me back to you Oh my reddest rose, caldera, set it off
How your fire grows, hermosa caldera
Glistening through your fused blows
Careen your caldera, set it off As your body flows, the second hand flashes
Passes over your skin like time
My love, anytime will do, my love
Anytime will do, my love Anytime will do, my love
Anytime will do
No choice of words will break me from this groove
Anytime will do
No choice of words will break me from this groove Anytime will do
No choice of words will break me from this groove
Anytime will do
What choice of words will take me back to you?
