

Through Different Eyes (Demo Version)

Fates Warning

We're walking within a shadow
Where echoes of different times resound
Looking for memories to relive
In yesterdays that can't be found Through different eyes we keep looking for what we lack
Changing minds take us away, and you can't go back And staring into ageless eyes
That shared secrets too dark for light
We're searching for old bonds in places
That lie forever out of sight Through different eyes we keep looking for what we lack
Changing minds take us away and you can't go back
To different times or ageless eyes, free from sorrow
Changing hearts will hide the past from tomorrow Through different eyes we try to find
People and places we've left behind Through different eyes we keep looking for what we lack
Changing minds take us away, and you can't go back
To different times or ageless eyes, free from sorrow
Changing hearts will hide the past from tomorrow Through different eyes we keep looking for what we lack
Changing minds take us away, and you can't go back
Through different eyes we keep looking for what we lack
