

Better

Katelyn Tarver

You don't call me enough
And I call you too much
You're fine just wasting time
And I'm always in a rush Sometimes it's easy with you
And sometimes it's tough
But I'll never give you up
I guess I love you too much Now I'm not so scared of forever
Yeah, life just tastes sweeter
'Cos I know that you'll be there Even when we don't have it together
We still have it better
We still have it better
With you it's always better, better, better, better You make me believe in me
When I think I'm not enough
My tears fall easily
And you're there to catch them all You see my crazy
Sometimes daily
And you still keep me around
Well I think it's safe to say that you've got me figured out Now I'm not so scared of forever
Yeah, life just tastes sweeter
'Cos I know that you'll be there Even when we don't have it together
We still have it better
We still have it better
With you it doesn't matter where wind or wherever, yeah through any weather Even when we don't have it
together
We still have it better
We still have it better
With you it's always better, better, better, better Now I'm not so scared of forever
Yeah, life just tastes sweeter
'Cos I know that you'll be there Even when we don't have it together
We still have it better
We still have it better
With you it doesn't matter where wind or wherever, yeah through any weather You see my crazy
Sometimes daily
And you still keep me around
Well I think it's safe to say you got me figured out
