

# You Say

## Bodyjar

You say you live your life so perfectly,  
how can I begin to see a shade of human life?  
You see a person's stance so crucially.  
Criteria for you and me and hate them just the same.

You say, you say.  
But it's all come to fall.

You say, you say.  
But it's all come to fall.

You say you live a life of poverty,  
that you partake of willingly,  
he knows who pays for you.

You say, you say.  
But it's all come to fall.

You say, you say.  
But it's all come to fall.

You say, you say.  
But it's all come to fall.

You say, you say.

Everything I said might not be true but it's the only way you'll let me  
think of you.

You say, you say.  
But it's all come to fall.

You say, you say.  
But it's all come to fall.

You say, you say.  
But it's all come to fall.

You say, you say.
