## Terminal

I don't mind if we never make it to where we're headed  
As long as we don't end up here  
We need to find our own way  
Believe in something we half made We're making good time  
Remember where we were last year  
Driving all around this tired town  
Looking for something to do and telling ourselves We need to find our own way  
Believe in something we half made  
We need to find our own way  
Believe in something we half made So many times I dreamt a normal life  
Seeing her at night and what it must feel like  
To wake up in my bed, no ringing in my head  
It's been sometime, it's been sometime It's based on love, we'll never know  
What the world could be, where this could go  
Called home to say I'm doing better  
Think I've finally may have myself together We need to find our own way  
Believe in something we half made  
We need to find our own way  
Believe in something we half made
