

# Holding On For Life

Ellie Goulding

Enemy, used to be  
Part of you, bittersweet  
But now you tell me lies  
Up and down, cold and hot  
Swear to God, got to stop  
'Cause I can't sleep at night If you wanted love like this  
Blowing up with every kiss  
Should've known better  
'Cause you find yourself alone  
Chilling you right to the bone  
No, should've known better You and me just  
Running towards the light  
Giving up the fight  
Hoping we survive  
You and me just  
Strangers in the night  
Giving up the fight  
Waiting to ignite  
Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life  
Lost in you, lost in me  
Afraid of love, in too deep  
So we just run and hide  
Lightning fast, felt the crash  
Scared to lose, fear attacks  
We only know goodbye You and me just  
Running towards the light  
Giving up the fight  
Hoping we survive  
You and me just  
Strangers in the night  
Giving up the fight  
Waiting to ignite  
Holding on for life  
Holding on for life

Holding on for life  
Holding on for life  
Holding on for life  
Holding on for life

Blowing up with every kiss  
Should've known better  
You find yourself alone

No, should've known better

Hopelessly holding on

## Let's pretend it's not gone

# Running towards the light

## Hoping we survive

## Strangers in the night

## Waiting to ignite

## Holding on for life

## Holding on for life

## Holding on for life

## Holding on for life

## Holding on for life

## Holding on for life

To all those perfect nights

And say we'll never die

Say we'll never die
