

# Long Way Around

## Blood Meridian

I want to live on a street in the movies  
The one with the trees that filters the sun out  
Little by little I could loosen up there  
And take the long way around  
Take the long way around

I want to live on a street in the movies  
I want my mind on undemanding things  
Honestly I could live without all of this  
And take the long way around  
Take the long way around

Where you are alive and well in me

---
