We're the Future

Fanfarlo

And at night I see us back to back,
opposites but joined by the spine
Yes at night I see us back to back,
opposites and welded by the spine
We're a copy of a copy
(Could we be the same?)
A capricious process gone awry
But I see blind innovation
(Can we really change?)
I see the future in us
Does it ever stay?
Can we change, can we go all the way?
If mutations get to have a say
If I wake up I'll be on my own;
We're the future, you and I
So I picture us as pioneers
As a feat of synchronicity
Yes I count on us to lead the way
Some day the world will follow
Or will they run away?
Can we change, can we go all the way?
If mutations get to have a say
If I wake up I'll be on my own;
We're the future, you and I
If we grow and multiply
Or if we wither, if we die
We can say at least we tried
