

Still We Dream

Carmen McRae

You and I
I think we know the reason why
so far its been quite charming
what's in store
it seems we played this scene before
which makes it less alarming

Dim the light and let's go on pretending
that this time its real
so round and round
the carousel is winding down
and still we dream of love

Dim the lights and let's go on pretending
that this time its real
so round and round
the carousel is winding down
and still we dream of love

we dream of love
we dream of love
