

# Straight Ahead

## Sick of It All

All the things you want  
All the things you need  
You got the power to choose  
You got the right to be all the things you loathe  
All the things you hate is what you will become  
Until you will go straight  
All the things denied  
The shit you can't believe  
You don't blame your self you  
Blame society  
All the things in life  
That you've been waiting for  
Wait outside your door  
All your problems won't go away  
I guess this is the price you pay  
Your decisions you will soon regret  
Throw away your life  
Go straight ahead  
I see you everyday wasting your time away  
You got no respect  
Got nothing good to say  
All the things you loathe  
All the things you hate  
See what you will become unless you will go straight  
All the things in life  
All that you want to be  
But you don't even try  
You want it all for free  
All the things in life that you've been waiting for  
wait outside your door
