The Level of Perception

Pestilence

Skeptical research of mind control
Fear of philosophical consequences
Theories given to master and use
The hidden abilities of your senses[Incomprehensible], explore minds' mystery
And capabilities, a subconscious releaseDistant perceptions from different times
Fragments from one's self consciousness
Deceptive visions can be so real
By trusting our gifted awareness[Incomprehensible] mental force set free
Personal energy, magic strength in meThe level of perception, reach incomprehension
Imagination lost in confusion, confusionHypnotic state of reality
Offering gifts through which you'll see
The secrets kept from humanity
And secrets, they will always beMental force set free
Personal energy, magic strength in meThe level of perception, reach incomprehension
Imagination lost in confusion
The level of perception reflects an illusion
Mind intuition, constructive delusion
