## Pennywise

Hey Listen, take a look around and tell me  
What's your story? What's your problem?  
in your head tangled inside are distorted images  
images telling you what it should be instead of what is Think about all that you have  
Not about what you can't get  
Think about all that you have  
Not about what you can't get Quick question: Don't you realize how worse off you could be living?  
or not living at all  
you're lucky and you should see how many good things come your way  
if you don't you won't make life a fun and pleasant stay Think about all that you have  
Not about what you can't get  
Think about all that you have  
Not about what you can't get If you don't feel good enough about life you should be shot  
I've got better things to do than worry about what is not  
I've got so many things to do yeah places to go yeah people to meet  
I got so many things to see yeah places to go and things to be  
I've got so many things to see yeah places to go yeah people to meet  
I got so many things to see yeah places to go and things to be Think about all that you have  
Not about what you can't get  
Think about all that you have  
Not about what you can't get
