Friday - Friday

Boy Kill Boy

It's the first steps I've ever taken
I decided never to delay
I need perfection, I need affection
I'll sweep the beats from the hits if that's okayFrom the mixer and to the fixer
We dine the freaks, and the fuckers on the stairway
And then a cafe, nine the morning,
We celebrate with the suckers on the subwayI know something needs to go
I know something you should know
I know something needs to go
I know something you should knowMy head is burning, my stomach's turning
The streets are heaving, look at all the people
You found the sad side, I found the good side
We're on the outside, looky ippy ay ohIt's not the first time, God knows the last time
We have a good time, singing 'Ippy ay oh'I know something needs to go
I know something you should know
I know something needs to go
I know something you should knowI know something needs to go
I know something you should know
I know something needs to go
I know something you should know
