Still Light

The Knife

The doctor came in the morning
She held my hand
And asked "was it worth it?"
"Could it be worse than this?"
Please recall
Give me a hint
Anything will do
If this was the last time now you should tell us what to doI was afraid I guess
Now I can't think no more
I was so concentrated
On keeping things together
I've learned to focus on
I didn't want to disappoint
Now where is everybody
Is it still light outside?
