

# Still Light

## The Knife

The doctor came in the morning  
She held my hand  
And asked "was it worth it?"  
"Could it be worse than this?"  
Please recall  
Give me a hint  
Anything will do  
If this was the last time now you should tell us what to do I was afraid I guess  
Now I can't think no more  
I was so concentrated  
On keeping things together  
I've learned to focus on  
I didn't want to disappoint  
Now where is everybody  
Is it still light outside?
