

Steel Inferno (Live Warschau)

Marduk

Praetorians reborn, relentless spiral of death
Armored spearhead
Time of trial, circle of fire
Rostow, Charkow, Kursk, Tarnapol
Encirclement and outbreak, blood-soaked soil
Moments of glory and pride
Panzer death ride
Death and hell on every side
Death and hell on every side
From youth under steel command
Working toward piece by piece
Camouflage gear rips
Streams of blood drip
Machine guns fire, praying lethal dose
Crawl across the killing field
Black cross - red star
From times, last laurels
Black sun shine us forth
God's soldiers, without god
No respite the blackguard dies
Loyal to the bitter end
High tide in the east, red deluge
On darkened wings death descend
Moments of glory and pride
Panzer death ride
Hell and death in every hide
Hell and death in every hide
Steel inferno
Panzer death ride
