

Last Chance Blueprint (Demo)

Rise Against

Late nights and bloodshot eyes, clock ticking half past five
We're barely breathing but we're still alive, go
Our plans are all laid out, take all these unmarked roads
We blaze the trails to places no one goes, yeah One last chance to go, if I don't leave tonight I never will
One last chance to go, let's take it now in for the kill In time we find ourselves, back where we started from
Too weak to fight and much too tired to run now
Before you swallow me into your perfect life
I'm not going out without a fight One last chance to go, if I don't leave tonight I never will
One last chance to go, let's take it now in for the kill But this blueprints faded grey, here it seems like just
yesterday
When we mapped out the details of our great escape
But still these roads all beckon me to uncover their mystery
But I fall like dead autumn leaves and let the jet stream carry me One last chance to go, if I don't leave tonight I
never will
One last chance to go
