Light as a Feather

Norah Jones

While the seasons will undo your soul
Time forgives us and it takes control
We separate our things to put us back togetherWe're light as a feather
Heavy as the weather
If it was raining stonesPut our hands together to applaud or pray
It's like the show was over
But we're too scared to walk away
All for the better, worse for the wearWe're light as a feather
God, you and I together
Meanwhile inside me it was raining stones
You didn't know, God bless your soulWe're light as a feather
Heavy as the weather
We're light as a feather
God, you and I together
