The Same Space

Klaxons

Some sort of assembly took us through time

Awakened my mind

I was as clockwork, you were alive

To prevent my eyes from surpriseWhen we wish for the same things many see signs

Some others find

When we're together we come alive

When we organizeCollective arrival

We share the same space

We feel the same impact

On arrival and embraceSome joining connection larger than life

Carried our minds

You were in contact

I was alive when your eyes united with mineWhen we rise through the stages

Many still minds grow as we find

We are connected weaving our lives

Now we're boundlessWe share the same space

We share the same space

We share the embrace
