

# Leave Me Here

## Cult of Luna

Out of a secret longing  
They know their way from here  
Out of a growing dream  
They follow the road we create I see what I've cut behind me  
Lost on the bottom you often found me there  
False conscience is beyond me  
Lost in the backwoods I lie open to you here  
Just leave me here These men are running hard  
But you keep down your voices  
Living only to judge heavy  
All mysteries aside there was a truth outside Leave me here and I'm born again  
Leave me here in this void again  
Now I am open left for dead  
Just like salvation comes in the end
