Last Days of Disco

Robbie Williams

Stand by me, I've been stood by you for ages Stay calm and carry on, maybe nothing's wrong Is it the comfort of disinformation or is it the freedom that you fear? Said I'm the angel of liberation, love, for a second I believe herI'm all you'll hear, aah, while you're here, aah Don't call it a comeback, look what I invented here I thought it was easy, they came and took it away from us The last days of discoAll raved out, bitter is the pill of devotion Read between the noise, all you disco boys, all you disco boys The fascination of a boy and girl in love, for a second I can see her In the mirror ball, the human animal, I'm the creature that I fearI'm all you'll hear, aah, while you're here, aah Don't call it a comeback, look what I invented here I thought it was easy, they came and took it away from us The last days of disco, the last days of disco The last days of discoI'm all you'll hear, aah, while you're here, aah Don't call it a comeback, we'll hold an event in here This space is beautiful, I'll decide when it is overSo don't call it a comeback, look what I invented here I thought it was easy, they came and took it away from us The last days of disco, the last days of disco
