Something Deep Inside

Billie Piper

The first time that it crossed my mind
I kept on pushing it aside
It's such a strong emotionSecond time, it's plain to see
This feeling rushing over me
Oh yeah, and unknown to me
This chemistry is something deep insideI can feel but I can't touch
Can never get too much
I hear you loud and clear
I've got nothing to fearYour love will be my guide
I've never been this satisfied
It's something deep insideThe third time was just as sweet
Boy, you make my life complete
Every thought and motion
It's hard just telling youBut everything I feel is true
Oh yeah, and unknown to me
This chemistry isYou do the thing that make me feel this way
It's so hard to find the right thing to say
But follow emotion, the love and devotion
You'll findYou do the thing that make me feel this way
It's so hard to find the right thing to say
But follow emotion, the love and devotion
You'll findYou do the thing that make me feel this way
It's so hard to find the right thing to say
But follow emotion, the love and devotion
You'll find
