

Get It Together

Seal

Now's the time for stepping out of place
Get up on your feet and give account of your faith
Pray to God or something or whatever you do
What I see can make me stop and stare
But who am I to judge the color of your hair
Surely all you're feeling much the same as I do
We got to keep this world together, got to keep it moving straight
Love like we mean forever, so that people can relate
If you're rolling to your left, don't forget I'm on the right
Trust and forgive each other
A little love and we just might
Yeah, yeah
(We gotta do something, we gotta do something, we gotta do something)
Yeah, Thinking of the troubles of today is it easier to put that gun away
Or is it difficult to stop the world to show that you care
Everything and everyone we know is beautiful
Surely you will be the guide in light to save us all
Maybe we can be the vision of a perfect man's dream

Cause we got to keep this world together, got to keep it moving straight
Love like we mean forever, so that people can relate
If you're rolling to your left, don't forget I'm on the right
Trust and forgive each other
A little love and we just might, just might,
(I have something, do you have something 'cause I got something for you)
(I have something, do you have something 'cause I got something for you)
(I have something, do you have something 'cause I got something for you)
(I have something for you)
We got to keep this world together, got to keep it moving straight
Love like we mean forever, so that people can relate
If you're rolling to your left (to the left), don't forget I'm on the right (on the right)
Trust and forgive each other
A little love and we just might (we just might)
We got to keep this world together, got to keep it moving straight
Love like we need each other, so that people can relate
If you're rolling to your left, don't forget I'm on the right
Trust and forgive each other
A little love and we just might, just might,
Everyone we know is beautiful, every one know is beautiful
