

Young Love

Coby Grant

In the start in the dark I didn't know
What you felt like on the inside, but the outside view was quite nice
Then we spent days in bed and time went slow
We started out adventure as we ventured out together
Knowing only
That our love was growing
Young love, young love nothing quite the same
Young love, young love it changes in a day
Young love, young love doesn't ask too much
Young Love, young love I think we're old enough
To know that this is much more than just

Young Love

You would ride your old bike to my house
And we'd walk down to the seashore and talk until the nightfall
Then one day when you came you announced
You would love me till forever so we ventured out together

Knowing only

That our love was growing
Young love, young love nothing quite the same
Young love, young love it changes in a day
Young love, young love doesn't ask too much
Young Love, young love I think we're old enough
To know that this is much more than just

Young Love

All the time that's gone by since you've been mine
Has been nothing but amazing and you still drive me crazy

When I catch you staring at my smiling softly
I come over for a kiss and I know I could die like this

Young love, young love nothing quite the same
Young love, young love it changes in a day
Young love, young love doesn't ask too much
Young Love, young love I think we're old enough
To know that this is much more than just

Young Love
