

Set You Free

[1000mods](#)

I am hurry
And I forget my name
Every single day I don't need you
And I found my way
Don't care what you say I am hurry
And I forget my name
It's a little bit late for shame I don't need you
And I don't feel no pain
There is nothing inside my vain I will set you free
I will tell you go away
I'm with you mother
He's done and that's his way I am running
And I'm going no way
There's a world full o' fame... Be safe I am hiding
To avoid endless days
Can't you have what he has these days? I will set you free
I will tell you go away
I'm with you mother
He's done and that's his way
