Let The People Know

Toploader

Running high, high, leave behind the shadows in your mind
Into the beginning of your life
Society breeds hatred in your heart
But baby, it's time to make a brand new startLife's ever changing in your eyes
But the time for rearranging will ariseThrough the rain and snow
Let the people know
Let the people know the way
And when it's time to go
Let the people show
Let the people show the wayLiving high, pushing back the boundaries with a smile
Effortless but only for a while
A deity comes to you in the night
Lightens up your day without a fightAnd life's still ever changing in your eyes
But the time for rearranging will ariseThrough the rain and snow
Let the people know
Let the people know the way
And when it's time to go
Let the people show
Let the people show the wayIf the people want to know
Show them the way
If the people got to know
Show them the wayLiving high, you left behind the shadows in your mind
The sun came out and put them out of time
The rhythm you can feel's in time with mine
Hey, so come on baby let's go for a rideAnd life still keeps on changing in your eyes
But changes come and go and so do IThrough the rain and snow
Let the people know
Let the people know the way
And when it's time to go
Let the people show
Let the people show the wayThrough the rain and snow
Let the people know
Let the people know the way
And when it's time to go
Let the people show
Let the people show the way
