

# California

## Lenny Kravitz

I was converted to the other side  
From the day I'd gotten there  
I met a girl who took me on a ride  
I was young I had no cares When I moved to California, California She played me records I had never heard  
While we toked on purple hairs  
Who, Zeppelin, Beatles, Kiss, The Rolling Stones  
While we played guitars in air When I moved to California  
California, California  
California love Venice Beach and P O P, station 26 was free  
Jeff Ho and Horizons west  
Dogtown skates they were the best  
Hang Tten, O P were the brands  
Don't forget the two-tone Vans I miss the apple and my schoolyard boys  
Nothing ever will compare  
But now I skateboard with my surfer girl  
And we really are a pair When I moved to California  
California, California  
California love
